

## Abstract

This study seeks to explore primary and secondary students' and teachers' experiences, attitudes and beliefs of learning and teaching programming respectively with robots in a private school in Abu Dhabi.

Specifically the research questions that guided the study were

1. How do primary school students perceive using robots to learn programming?
2. How do secondary school students perceive robotics to get introduced to engineering and programming careers?
3. How do teachers perceive using robots as educational tools to teach programming?

A qualitative method was used to collect and analyse data with student and teacher questionnaires; focus group and teacher interviews and classroom observations. The sample of this study included 53 primary students, 12 secondary students and 6 teachers at a private school in Abu Dhabi following the UK curriculum.

The results of the present study revealed that while most of the primary students are highly motivated and interested in robotics, only very few developed problem solving or critical thinking skills and transferred concepts to other subjects or real life. All the secondary school students who have optionally taken robotics in order to participate in the competitions were motivated, interested and perceived the subject as a stepping stone to STEM careers. While all the teachers perceived robots to be valuable educational tools they also identified difficulties in its successful implementation.

Recommendations, based on the findings of the research, are suggested at the end of this paper and are addressed to educators for improvement in the implementation of robotics in schools and to researchers to develop better teaching and training strategies for teachers and activities to cater to students of all abilities.

**KEYWORDS:** Robotics, Programming, Perceptions, LEGO MINDSTORMS NXT

## **DEDICATION**

**I dedicate this dissertation to my three children and my mother who  
convince me that life is beautiful in spite of its ups and downs.**

## **ACKNOWLEDGEMENTS**

**I would like to thank my family for bearing with me while I pursued my Masters in Education.**

**I would like to thank all my professors who made my journey interesting and worthwhile.**

**I would like to thank my peers for making these last two years fun.**

**My fond gratitude goes to my personal tutor Dr. Sufian Forawi who encouraged me throughout the course.**

**I would especially like to thank Dr. Naz Awan for her timely guidance and encouragement throughout the course and the dissertation.**

**Lastly, I would like to thank Mrs. Radhika O'Sullivan for being there whenever I needed her help.**

## TABLE OF CONTENTS

<b>CHAPTER ONE - INTRODUCTION</b> .....	1
Overview.....	1
Statement of the Problem .....	4
Background of the Research.....	5
The Research Questions.....	8
Significance of the Study.....	9
Organisation of the Research.....	9
<b>CHAPTER TWO - LITERATURE REVIEW</b> .....	10
Papert’s Constructionism.....	10
Learning with LEGO NXT MINDSTORMS.....	12
Metacognition and Learning .....	15
Metacognition and Programming.....	16
Importance of Perceptions.....	18
Pilot Study.....	19
<b>CHAPTER THREE - METHODOLOGY</b> .....	22
Research Method .....	22
Ethical Issues .....	22
Gaining Access.....	23

Participants.....	23
The Present Study.....	23
Data Collection Techniques .....	25
Questionnaires.....	25
Interviews .....	26
Observations.....	27
Data Analysis.....	28
Students' Questionnaires.....	28
Teachers' Questionnaires.....	28
Focus Groups.....	28
Teacher Interviews .....	29
Observations.....	29
<b>CHAPTER FOUR - RESULTS.....</b>	<b>30</b>
Students' Perceptions on using robots to learn programming.....	30
Primary Students .....	30
Secondary Students .....	35
Teachers' Perceptions on using robots to teach programming.....	40
Primary School Teachers.....	40
Secondary School Teachers .....	45
Summarised Observation Notes.....	48
Primary School.....	48
Secondary School.....	49

<b>CHAPTER FIVE - DISCUSSION .....</b>	<b>51</b>
Students' Perceptions/Primary .....	51
Students' Perceptions/Secondary.....	54
Teachers' Perceptions/Primary.....	56
Teachers' Perceptions/Secondary.....	59
<b>CHAPTER SIX - LIMITATIONS AND RECOMMENDATIONS .....</b>	<b>61</b>
Limitations.....	61
Recommendations for Improvement after Present Study.....	62
Recommendations for Future Research .....	63
<b>CHAPTER SEVEN - CONCLUSION .....</b>	<b>64</b>
