ACKNOWLEDGEMENT

I present this work to the blessed soul of my parents who nurtured me and supported me to complete my studies.

I would like to express my gratitude to Dr. John, my supervisor, who exerted serious efforts to help me, followed up my thesis chapter by chapter and provided me with constructive feedback.

My thanks are also extended to Dr. Yasemin, Dr. Clifton and Dr. Sufian for their help and assistance.

Finally, I will never forget the encouragement and tolerance of my family members: My sister Salwa and my brothers, Haytham, Ayman and Mazen.
