Abstract:

Project Management tools and practices has its roots deeply and firmly embedded in scientific based processes. This fundamental scientific basis gives Project Management theories and their application, a source of dynamism and adaptability to varying needs due to change in circumstances.

Project Management practices and their application changes with the varying circumstances and their area of application. One of the major factors affecting this variance is the prevalent financial environment, which in turn can alter the very basis and yardstick to measure the project success.

With the whole world facing uncertain times due to continuing financial turmoil, it is imperative for the project management practices to adapt themselves to this revised world order and act as a measure to achieve desired project success.

Based upon a combination of literature study and, survey and interview sessions with the various industry professionals; with the help of triangulation method, this study attempts to analyze current management practices employed in the construction industry and, their perceived adaptability and suitability during the expected period of economic revival.

المستخلص:

ممارسات إدارة المشاريع والتغييرات تطبقها مع الظروف المتباينة ومنطقة تطبيقها. واحدة من العوامل الرئيسية التي تؤثر في هذا التباين هو البيئة المالية السائدة، والتي بدورها يمكن أن يغير أساسا جدا ومقياسا لقياس مدى نجاح المشروع.

ممارسات إدارة المشاريع والتغييرات تطبقها مع الظروف المتباينة ومنطقة تطبيقها. واحدة من العوامل الرئيسية التي تؤثر في هذا التباين هو البيئة المالية السائدة، والتي بدورها يمكن أن يغير أساسا جدا ومقياسا لقياس مدى نجاح المشروع.

مع العالم كله يواجه الأوقات المضطربة بسبب استمرار الاضطراب المالي، لا بد لممارسات إدارة المشروع إلى التكيف مع هذا النظام العالمي المنقحة وتكون بمثابة تدبير لتحقيق نجاح المشروع المطلوب. استنادا إلى مزيج من دراسة الأدب و، والمسح والدورات مقابلة مع مختلف المتخصصين في هذا القطاع، مع مساعدة من طريقة التثليث، تحاول هذه الدراسة تحليل الممارسات الحالية لإدارة العاملين في صناعة البناء والتشييد، وقدرتها على التكيف المتصورة وملاءمة خلال الفترة المتوقعة من الانتعاش الاقتصادي.
